

End of Life Notification for Plasmon CDR480 CD Recorders

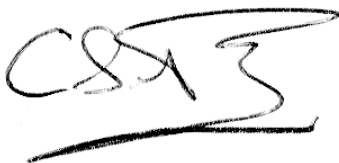

With CD Recorders now a mainstream, high volume, low margin business, Plasmon Data will be ceasing all branded desktop products based on the above drive. Should any of our customers have existing commitments for any of these products we will be taking last orders before December 11th 1998. Please contact your account manager for details. We will, however, continue to use this excellent drive in our D-Series CD format jukeboxes. The products that are involved are as follows:

Model	Description
CDR480I-BULK	CD-Recordable disc drive supplied as an internal unit in bulk packs of 10. Minimum order 50 units. No manual included.

CDR480E-MAC	As CDR480E, but including Astarte TOAST software.

Plasmon Data manufactures high end storage solutions using MO as well as CD technology, and further new products being announced over the coming months will continue to develop this core business alongside the media and software divisions.

All warranties and service will continue to be provided for the CDR480 by Plasmon Data.

For more information or clarification on any points listed above please contact your Plasmon Regional Office.
