

1st September 2005

**End of Life Notification for
Plasmon's G64 and G104 Optical Libraries**

Please be advised that effective from 1st September 2005 G64 and G104 Optical Libraries (with MO or UDO drives) are End of Life, the products will then become End of Supply from 1st October 2005. The products that are involved are as follows;

G64-910-x	64 slot Optical Library
G64-UxN0	64 slot Optical Library
G64-MxN0	64 slot Optical Library
G64-UxNx	64 slot Optical Library
G104-910-x	104 slot Optical Library
G104-UxN0	104 slot Optical Library
G104-MxN0	104 slot Optical Library
G104-UxNx	104 slot Optical Library

Where x equals the number of drives present (between 1 and 4). "910" or "M" represent 9.1GB MO drives. "U" represents UDO drives.

Plasmon commit to provide service and support to the products listed above until 31st August 2012.

Plasmon has replaced the above products with our Gx range of solutions, offering similar features but at a lower cost per GB. The G64 is replaced with the Gx80 (80 slots with 2 drives or 72 slots with 4 drives). The G104 is replaced with the Gx134 – available with 2 or 4 drives with 134 slots.

For more information or clarification on any points listed above please contact your Plasmon Regional Office.
