

29 November 2007

End of Life notice for 9.1GB MO Drives used in G and Gx-Series Libraries

Plasmon hereby provides formal notification of the discontinuance of the current Sony MO (Magneto-Optical) Drive, Model Number SMO561, in Plasmon's G and Gx Series Libraries effective 1 April, 2008. This discontinuance includes all Plasmon products currently incorporating the SMO561 MO Drive and related product accessories.

These include, but are not limited to;

- Enterprise G-Series (All models)
- Gx- Series Libraries (All Models)
- 910 Desktop Drives

Depending on available inventory, drives may continue to be available after this date but with no guarantees of supply. Should you have any visibility of requirements in this interim period, we would encourage you to register your forecast with Plasmon.

Full warranty and service will continue on these drives, in line with Plasmon's standard EOL support program, through to 31 March 2013. Conditions are included in Plasmon's guide to customer care. In the event there is a limited availability of the drive during the support period, Plasmon may offer a repair service or re-manufactured drives.

For more information or clarification on any points listed above, please contact your Plasmon sales team.
