RF6950I	Internal version of above for mounting in half height 5¼" slot
RF6950J	Jukebox version of the RF6950 drive.
M20-695-x	20 slot, 52GB optical jukebox with one or two drives.
M32-695-x	32 slot, 83GB optical jukebox with one or two drives.
M52-695-x	52 slot, 135GB optical jukebox with two drives.
M104-695-x	104 slot, 270GB optical jukebox with two or four drives.
M156-695-x	156 slot, 405GB optical jukebox with two, four or six drives.
M258-695-x	258 slot, 670GB optical jukebox with two, four or six drives.
M500-695-x	500 slot, 1.3TB optical jukebox with two, four or six drives.

Final orders will be despatched **31st December 1998** and applies to Europe, Africa and the Middle East.

Plasmon undertakes to provide warranty and out of warranty spares for the RF6950 for the next five years.

The mod520 and associated -520 jukeboxes replace the RF6950 drives and derivatives listed above. This drive doubles the capacity of previous drives and jukeboxes with 5.2GB media. The mod520 drive can also read and write 4X media (i.e. 2.6GB and 2.3GB rewritable and WORM) and read 2X and 1X media.

Upgrade options are available allowing the doubling of capacity in your existing installations.

For more information or clarification on any points listed above please contact your Plasmon Regional Office.
