Gx Configuration Tag Change List

Plasmon Gx libraries will start to include a configuration tag, figure 1. Plasmon manufacturing implementation will be on week of Nov 21 2005. The label will be located on the drive/main controller cover between the 2 yellow caution labels, figure 2. The tag allows Plasmon MFG and Kodak FS to document major hardware changes. A table as shown in figure 3 below will be kept updated on the Plasmon website under Kodak access. The Lift Body/MTE FRU will have a label for Plasmon to adhere to the library. A technical bulletin is coming.

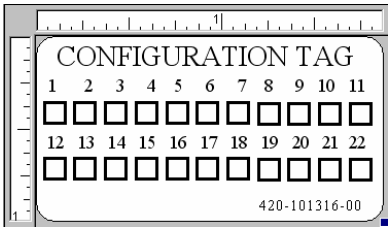

Figure 1

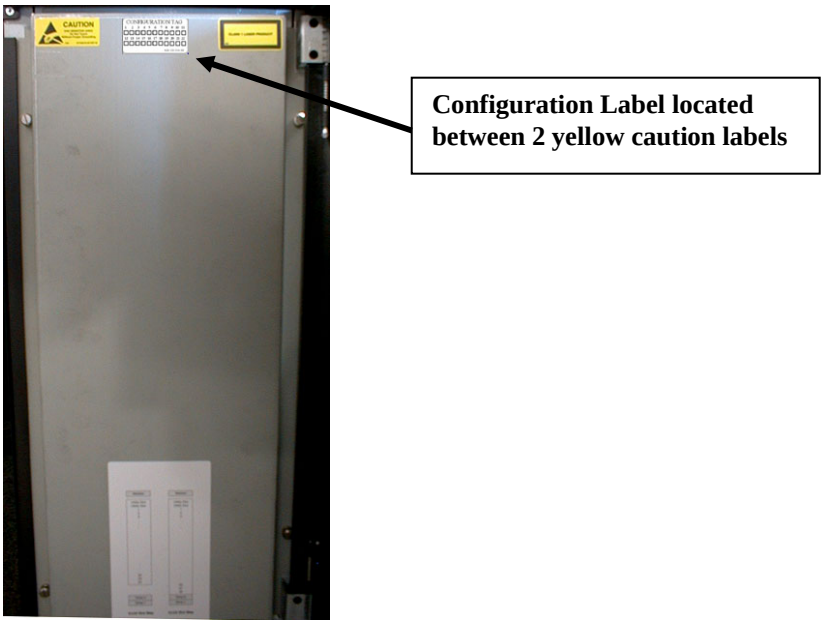

Figure 2

Configuration Tag Number	Short Description / Overview	Bulletin Number
1	New Style Gx MTE and Installation	GxTB011
2	New Gx Internal SCSI Cables backward compatible	GxTB012
