

## Authorized Service Partner (ASP) Training Schedule – 2014

Enrollment in the Alliance Storage Technologies, Inc. (ASTI) 2014 Certification training is now in progress!

These training classes are *exclusively* available to ASTI Authorized Service Providers.

Training is held at ASTI headquarters in scenic Colorado Springs, Colorado. Courses will include hands on training, installation of libraries, electro-mechanical repair, system diagnostics, AA system configuration, and trouble shooting of G and AA Series libraries in order to complete repairs in the field.

Upon request, ASTI may make available to an ASP localized training, for FEs and other integral staff, at a location other than ASTI's corporate headquarters in Colorado Springs. For this training the ASP shall be responsible for travel, logistics, per diem and other expenses incurred by either Party to facilitate this training.

Field engineers and technicians will gain the knowledge, confidence, and skill needed to service ASTI/Plasmon equipment. During the week-long training session, participants will learn firsthand from ASTI technical experts. Real-world examples and hands-on experience will be used to build knowledge and improve skills.

Attendees will also learn about the new products and services coming soon! We are busy at work developing professional data archiving solutions that will meet and exceed the industry demands of tomorrow.
